Summary

20. 26.—Whereas it has been found necessary to take steps to control the production, production and sale of denatured spirits in the Modern Rectifying, the following rules have been framed by the Board of Revenue, under section 2, Act XVI of 1863, and sections 15 and 16 of the Alkali Act 2 of 1868, in that regard in pursuance of those contained in Notification No. 7, dated 7th February 1910, published in paper 351 and 352 of the Port St. George Gazette, dated 5th February 1910, Part II, City will come into force from and after 1st January 1911:—

1. Denatured spirit is spirit rendered effectually and permanently unfit for human consumption by the addition of light camphoraceous and crude pyrites loans wholly made from a mineral source, or wood-naphtha, or other equal denaturants, approved of by the Board of Revenue.

2. Denatured spirit is liable to a duty of 1 per cent. of value: the duty being calculated on the inferred from price of such composition at the distillery, less the discount, if any, allowed to producers and the duty. Distillers should, when applying for a permit, declare the sale price of the spirit at the distillery for the purpose of calculating the duty thereon.

3. Denatured spirit may be manufactured by holders of distillery licenses in the Presidency, provided (1) that the light camphoraceous and pyrites loans to be mixed with the spirit are first tested and approved in the Board's Laboratory; (2) that they must be kept under the lock and key by, and sent under the supervision of, the distillery officer; (3) that they must be used on the proportion of 4 gals of light camphoraceous and 4 gals of pyrites loans to 90 gallons of the spirit; and (4) that the spirit shall not be of less strength than 50 per cent. over proof. Similar conditions apply to the use of wood-naphtha, in the special cases where its use is permitted, with this difference that one part by volume of crude wood-naphtha shall be mixed with nine parts of spirit and that the use of wood-naphtha is a highly privileged condition and will be permitted. The Board's previous sanction should be obtained as terms of special methods of denaturation for spirit intended for use in particular cases and conditions.

4. Spirit denatured with light camphoraceous and pyrites loans may be imported by sea, but samples must be submitted to the Board's Laboratory and there certified to be fully denatured before removal from the Customs-house can be permitted. In the case of imports by sea from other Presidencies a certificate from the Collector of Customs at the port of shipment to the effect that the spirit denatured must either be denatured at sea or must pay duty at the full tariff rate. Spirit that is not sufficiently denatured or after usual denaturation can be imported only with the special sanction of the Board.

5. Licenses (M.S.-5) for sale of spirit denatured with light camphoraceous and pyrites loans will be issued by Collector, free of fee, in respect of applications in their showing that they have a legitimate demand for such spirit. All such applications should be forwarded to the Collector through the Inspector of the Salt, Alkali and Customs Department of the Circle in which the applicant wishes to hold his license. The issue of licenses to persons licensed to sell liquor for consumption on the premises is prohibited.

6. The holders of M.S.-1 licenses may obtain their supplies of spirit from the Customs-house or distillery on production of a written permission (M.S.-2) from the Collector of the District in which the Customs-house or distillery is situated for the removal of the same. Books of bills of application for such permission (M.S.-3) will be supplied to them. These applications should be forwarded to the Collector concerned through the Collector of the district in which the applicant wishes to transport the spirit. The licensees can also be empowered to sell spirit to one another and to holders of M.S.-1 licenses up to a maximum of 20 gallons at a time. The transport of spirit thus sold should be secured by a permit to be granted by the officer in each case. Books of permits (M.S.-4) for the transport of the spirit to be obtained from holders of M.S.-1 licenses in quantities exceeding one gallon but not exceeding 20 gallons will be issued to holders of Class licenses on application to the Collector of the district in which they carry on their business.

7. Vendors and others requiring spirit denatured with light camphoraceous and pyrites loans for use in their business, but not for sale, will be given special licenses (M.S.-1a) on application, supported by evidence as to their requirements through the Inspector of the Circle, to the Collector of the district in which they carry on their business. They will be supplied by distillers or through the firm (M.S.-5a). These licenses may also obtain their supply of spirit from holders of M.S.-1 licenses up to a maximum of 20 gallons at a time.

8. Holders of M.S.-1 and M.S.-1a licenses will, on application to the Collector of the district in which they carry on their business, be furnished with books of regulations (M.S.-6) authorizing them to obtain and deal denatured with light camphoraceous and pyrites loans in quantities exceeding one gallon but not exceeding 20 gallons at a time from holders of M.S.-1 licenses.

9. Similar licenses (M.S.-1b) will be given to vendors and others who, for special reasons, require spirit applied with wood-naphtha. The provisions will be the same except that (unless the Board has given a special authority to import) the spirit will be obtainable only from land distillers and that the license will be required to enter into a bond (M.S.-8) with the Collector undertaking to use the M.S.-2a, M.S.-2b, Persons holding these licenses will also be allowed to use M.S.-1b, recognition of one repeated quart at a time, on the use of it being followed by not more spirit up to a standard mark. But when any is to be received by the seller in his stock book until the latter is imported by an alkali officer.

10. A special license in form M.S.-1c will be issued to the Railway Companies in the Presidency for the storage and use of spirit denatured with light camphoraceous and pyrites loans and its distribution for such purposes as may be specified in the license. The licensees may also be permitted to use the license and so forth. The licensees may obtain their supplies of the spirit from the Customs-house or distillery in which the Customs-house or distillery is situated from the Collector of the district in which the Customs-house or distillery is situated (M.S.-2a) to be obtained from the Collector of the Railway Companies will be exempted from taking and paying license for individual stations for the removal and use of the spirit received from the M.S.-1a licenses. The transport of spirit should be secured by a permit (M.S.-4) to be granted by the Revenue in each case.
